

INFORMATION SECURITY POLICY

Furukawa Electric Autoparts Central Europe s.r.o. (hereinafter referred to as the "Company") recognizes the importance of information security and actively implements the basic information security policy of its parent company, Furukawa Electric Co., Ltd. The Company is committed to:

- establishing and maintaining a system for the appropriate use and protection of the information assets it owns throughout the entire information lifecycle, from the moment of their creation, through transmission and use, to their disposal;**
- establishing and maintaining a system that prevents the infringement of rights related to third-party information assets.**

Basic Principles

The company is committed to implementing information security measures based on the following basic principles.

1. Information is accessible only to the extent necessary for the performance of assigned tasks
2. Employees comply with guidelines, laws, regulations, standards, and contractual obligations related to information security
3. If an information asset is entrusted to a supplier, the supplier is required to provide at least the same level of information security as within the company.
4. We regularly review the information security management system and continuously improve it.
5. We educate and develop our employees, suppliers, and partners in the area of information security management.
