

Requirements of Furukawa Electric Autoparts Central Europe s.r.o. (FACE) on box labels used by suppliers.

we are using scanning system for receiving of all materials in our warehouse and receiving of the material is done by codes.

Codes could be 1D (barcode) or 2D (Datamatrix, QR code)
requested are those information:

1, supplier number

2, part number

3, LOT

4, quantity

and optionally 5, delivery note number 6, purchase order number

(5 and 6 codes can be also in delivery note or invoice)

In case of 1D all information have to be separated. VDA standard is appreciated.

In case of 2D all information are in one code

Structure of the code has to be approved by FACE before 1st shipment at latest

Maximum size of LOT is 17 characters

Maximum size of quantity is 6 characters

FACE prefer usage of 2D codes

In case of any question do not hesitate to ask to below contact:
